The time period for reply, if any, is set in the attached communication.

Office Action Summary

Application No.

10/537,418

Applicant(s)

DAVID ET AL.

Examiner

Krishnan S. Menon

Art Unit

1797

Period for Reply -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 14 August 2008.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1, 4-6 and 8-14 is/are pending in the application.
- 4a) Of the above claim(s) 6 and 11-14 is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1, 4, 5 and 8-10 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO/SI/08)
- 4) ☐ Interview Summary (PTO-413)
- 5) ☐ Notice of Informal Patent Application
- 6) ☐ Other: _____
- Paper No(s)/Mail Date _____

DETAILED ACTION

Claims 1, 4-6 and 8-14 are pending as amended 8/14/08, of which claims 6 and 11-14 are withdrawn from consideration.

Claim Rejections - 35 USC § 102/103

1. Claims 1,4,5 and 8-10 are rejected under 35 U.S.C. 102(b) as being anticipated by, or in the alternative, under 35 USC 103(a) as obvious over, Lorey et al (US 4,995,974).

Lorey teaches (see fig below) an inner tube (112) with open top and closed bottom, having a hydrophobic membrane (138) around it, and located inside an outer tube (114), outer tube having an outlet in the bottom (156) and vent at the top (158). Membrane is PTFE and the pore size overlaps the range claimed (column 3, lines 3-9 and 45-50).

The reference teaches the outer tube also as covered with a PTFE membrane, the whole thing installed in a container or housing, and that the figures 3 and 4 are for horizontal operation. However, these details do not disqualify the reference, claims are open-ended. Moreover, the hydrophobic membrane would pass the organic liquids through the membrane from the outer tube; and the pores of the membrane would also allow air venting. Oil/water separation is intended use.

Material of outer tube is plastic or glass or metal as in claim 10.

With respect to claim 4, the inner tube has a wider (flanged) top.

Regarding claim 5, applicant elected this claim as readable on figure 1, even if claim 5 appears to be directed at figures 6-8, and thus is considered as an obvious equivalent of applicant's fig 1. The bottom surface of inner tube formed by the cone (126) in side the inner tube has a slope as claimed.

U.S. Patent

Feb. 26, 1991

Sheet 3 of 3

4,995,974

2. Claims 1,4,5 and 8-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hunnicke-Smith (US 2002/0185429).

Details of claims 1,4 and 8-10 are clear from the exploded view of the device shown above, which are figures 1 and 2 of the Hunicke-Smith reference. Material of the outer tube is plastic or glass. Membrane is Teflon, pore size can be as desired, and also in the claimed range – see paragraphs 34-36. Oil/water separation is intended use.

Applicant's fig 2b - see applicant's fig 1 and 2b reproduced below. In the reference, the 'large diameter upper end' of the inner tube (the flange) rests or stops on the rim or upper end of the outer tube as in claim 4.

Regarding the vent as recited in claim 1, since the inner tube is only resting over the top rim of the outer tube as seen in the figures of the reference (no tight seal), the top opening (mouth) of the outer tube functions as a vent. Also, providing a vent hole when necessary would be within the skill level of one of ordinary skill in the art, and such vents are also well known in the art.

Alternately, if one were to follow applicant's arguments, then the membrane can be the inner tube and the perforated tube can be the outer tube, which has holes or perforations for venting as well as draining the liquids.

Claim 5 is considered as an obvious equivalent of applicant's fig.1, and thus obvious over this reference.

Response to Arguments

Arguments are moot – new grounds for rejection. Argument that Hunicke-Smith teaches a device for centrifugation is not persuasive: it is only an intended use.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Krishnan S. Menon whose telephone number is 571-272-1143. The examiner can normally be reached on 8:00-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David R. Sample can be reached on 571-272-1376. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
